

XXL-Rehab Comfort foam mattress

Pressure relief designed exclusively for bariatric users!

The XXL-Rehab Comfort foam mattress is a standard mattress which works perfectly with nursing beds. The mattress secures a soft but still effective distribution of the load combined with a unique stability that helps the user to obtain the ability to reposition him/herselves.

The mattress is mainly intended for bariatric users with a low risk of developing pressure sores.

The bottom part of the mattress consists of a 15 cm layer of heavy duty PU-foam cut into springs. This feature secures a lower "push back" effect on the user and at the same time ensures an air flow within the mattress, thereby minimizes the accumulation of heat.

On top of the 15 cm PU-foam lies a 3 cm layer of viscoelastic foam. This layer ensures maximum adaption to the surface of the user and thereby also a greater weight distribution and pressure relief.

The XXL-Rehab Comfort foam mattress has a 2 way elastic incontinence cover. The cover is antibacterial, antiallergic and fire resistant. It can be machinewashed.

The XXL-Rehab Comfort Foam mattress can be turned horizontally in the bed to prolong the life of the mattress.

SPECIFICATIONS	Model 1	Model 2
Maximum weight-bearing capacity is	300 kg	
Length	200 cm	
Width	100 cm	120 cm
Height	18 cm	
Order No	0240-100-000	0240-120-000
