

XXL-Rehab Patient Lift and Slings

Strongly engineered and functionally designed exclusively for bariatric users!

The XXL-Rehab Patient Lift is designed to make hoisting a simple and functional task. The lift is both easy to manoeuvre, uncomplicated to operate and provides security for both user and operator.

The lift is supplied with an electrical V-shaped leg-opening mechanism with a maximum loading capacity of 300 kg. A built-in weighing scale is also available.

The XXL-Rehab Lifting sling provides comfort and safety for transfers in lying and seated positions.

Our slings can be used on any mobile or ceiling-mounted lift that utilises a hanger with hooks for sling strap attachment.

XXL-Rehab Bath Sling.
Also available as Half Sling.

XXL-Rehab Universal Sling with head support.
Also available as Shower Sling.
