

XXL-Rehab Rollator King

Strongly engineered and functionally designed exclusively for bariatric users!

With a weight capacity of 295 kg the XXL-Rehab Rollator King is one of the strongest walkers.

It is both functional and has a light and discrete design. It fits through doorways and folds easily for transport and storage in cars.

It includes a large seat, extra strong tubes and 8" massive tires that provide extra security, stability and comfort.

The XXL-Rehab Rollator King has a large support surface. When the user sits down heavily, the back arch prevents that the weight is placed too far – beyond the support surface. In this way, the risk of accidents is prevented significantly.

The critical point for rollators for bariatric users are the brakes. The XXL-Rehab Rollator King has "feather touch" hand brakes that provide superior control and ensure the walker is easy to manoeuvre and to hold the weight.

The rollator comes with a basket and the handles are fitted with reflectors.

The new design with iron forks and wide tires gives a smoother drive and safe handling.

- Extremely strong and stable lightweight
- Easy to fold and manoeuvre
- "Feather touch" hand brakes
- Fits through doorways and into cars
