

XXL-Rehab Bariatric scale

Strongly engineered and functionally designed exclusively for bariatric users!

The XXL-Rehab Bariatric scale is especially suited for dietary consultations, adiposity clinics, hospitals and rehabilitation institutes due to its large and low tread and the stable handrails. Special handholds at eye level provide orientation and safety to bariatric patients. In addition to EU Class III and the MPG certification, the high accuracy, the simple operation and the easy to read rotating indicator are further important factors for weighing operations with bariatric, handicapped patients.

Standard version

- Approved Class III, MPG Class 1.
- Platform size: 890 x 890 mm.
- Tread: 84 mm high.
- Indicator made of aluminium with plastic parts.
- 7-digit LCD-Indicator, back-lighted, digit height 20 mm.
- Indicator rotatable by 180° for more comfortable reading.
